The Problem

Retail investors are left behind in the AI revolution

87%

of retail investors **underperform**
market benchmarks (Dalbar 2025)

€0

access to institutional-grade
AI trading tools for individuals

62%

of Europeans lack basic
financial literacy (OECD 2024)

Status Quo

- Institutional AI tools cost \$50K-500K/year
- Free tools lack DRL/ML — rely on lagging indicators
- Financial education is boring, text-heavy, and disconnected from practice
- No platform combines analysis + education + risk management

Opportunity

- \$12B retail trading tools market (CAGR 18%)
- 500M+ retail investors globally seeking AI advantage
- EU pushing financial literacy mandates (OECD PISA)
- GPU compute cost has dropped 90% in 5 years — enabling personal AI

The Solution

FinPilot: Your AI-powered financial copilot

⚡ Smart Scanner

Scans 500+ stocks in seconds using multi-timeframe analysis (15m/1h/4h/1D) with ML-calibrated signals. Filters noise, surfaces actionable opportunities.

RSI · MACD · EMA · Bollinger · ATR

🧠 DRL Strategy Engine

15 trained Deep Reinforcement Learning agents (PPO, SAC, TD3, A2C, Recurrent PPO) generate adaptive buy/sell/hold signals that respond to market regime changes.

PyTorch · Stable-Baselines3 · CUDA

🎓 FinSense Academy

Interactive financial literacy platform with 100+ term dictionary, AI-powered explanations, quiz module, strategy guides, and compound interest calculator.

LLM-Powered · 3 Languages · Gamified

🛡️ PilotShield Risk Controls

- Kelly Fraction position sizing with ATR-adjusted stops
- Portfolio concentration & correlation warnings
- Automated pre-flight checklists before every trade

📱 Telegram + Web + PWA

- Real-time signal alerts via Telegram bot
- Responsive Streamlit dashboard + planned Next.js UI
- Public website with PWA support (EN/TR/DE)

Technology Stack

GPU-accelerated Deep Reinforcement Learning at the core

DRL Pipeline (GPU-Intensive)

Framework	PyTorch + Stable-Baselines3
Algorithms	PPO, SAC, TD3, A2C, Recurrent PPO (LSTM)
Models	15 trained specialists (market, swing, day, scalp)
HP Optimization	Optuna (400+ trial grid search)
Validation	Walk-Forward Optimization (WFO)
Regime Detection	HMM + regime-aware ensemble voting

LLM / AI Inference

Cloud LLM	OpenAI GPT-4o API (FinSense)
Local LLM	Ollama (Llama 3, Mistral) — planned
Inference	TensorRT optimization planned

Platform Stack

Language	Python 3.11 (56,500+ LOC)
UI	Streamlit → Next.js (migration planned)
Data	yfinance, Polygon.io, alternative data APIs
Alerts	Telegram Bot API (real-time signals)
CI/CD	GitHub Actions, Docker, pytest (493 tests)
Monitoring	Prometheus + Grafana + Sentry

NVIDIA TECHNOLOGY STACK

- PyTorch + CUDA — DRL training acceleration
- TensorRT — Model inference optimization (planned)
- NVIDIA GB10 DGX Spark — On-prem training hardware (purchasing)
- cuDNN + NCCL — Deep learning primitives
- Blackwell Tensor Cores — FP4/FP8 inference for local LLMs

NVIDIA Alignment

Why FinPilot is a natural fit for the NVIDIA Inception ecosystem

Hardware Investment

We are **purchasing an NVIDIA GB10 DGX Spark** (Blackwell architecture) as our primary AI training and inference workstation.

- 128GB unified LPDDR5x memory
- 1 PFLOP FP4 AI compute (Blackwell Tensor Core)
- NVLink-C2C for zero-copy CPU↔GPU data transfer
- Budget: €3,800 — already evaluated and ready to purchase

Performance Impact

WORKLOAD	CURRENT (CPU)	WITH GB10
15 DRL Models Training	9.2 hours	~30-60 min
Optuna HP Search (400 trials)	~12 days	~14-28 hours
RPPO/LSTM Training	3.5 hours	~5-20 min
Local LLM (70B)	Impossible	Real-time

Hybrid Architecture — On-Prem GB10 + Cloud GPU

On-Prem (NVIDIA GB10)

- Daily DRL model training & retraining
- Local LLM inference (privacy-safe, 70B models)
- Real-time signal engine (low-latency)
- Model registry & experiment tracking

Cloud (NVIDIA GPUs on GCP/AWS)

- Burst Optuna hyperparameter search (100+ parallel trials)
- Large-scale backtesting across 1000+ symbols
- TensorRT model optimization & serving
- Global web UI deployment via CDN

Traction & Milestones

Built and validated — ready for GPU-accelerated scale

TESTS PASSING

15

TRAINED DRL AGENTS

Completed

- Full MVP — working Streamlit dashboard (3 pages)
- 15 DRL agents: PPO, SAC, TD3, A2C, Recurrent PPO specialists
- FinSense Academy — 100+ terms, quiz, compound interest calc
- Public website (PWA) — 3 languages (EN/TR/DE)
- Beta waitlist active + BrokeAI landing page
- Telegram bot for real-time signal alerts
- PilotShield risk management suite
- Walk-forward backtesting validation pipeline
- CI/CD pipeline (GitHub Actions, Docker, 493 tests)
- Privacy policy & GDPR compliance foundation

Next (GPU-Accelerated)

- DRL model performance: Sharpe 0.057 → target >0.5 (GPU training enables 10x more iterations)
- Curriculum learning + market regime specialization
- Local 70B LLM inference via NVIDIA GB10
- TensorRT model optimization for real-time scoring
- Next.js web UI migration (Apple-style design)
- 1,000 beta users within 12 months
- EU regulatory preparation (MiFID II compliance)
- SaaS launch — subscription model (Freemium/Pro/Enterprise)

Market Opportunity

Massive TAM at the intersection of AI, FinTech, and EdTech

\$12B

TAM — RETAIL TRADING TOOLS
CAGR 18% (2024-2030)

\$5.2B

SAM — AI-POWERED ANALYTICS
European market share target

\$380M

SOM — INITIAL TARGET (3 YR)
DACH + EU early adopters

Target Segments

SEGMENT	SIZE	APPROACH
Self-directed retail investors	150M (EU)	AI signals + risk tools
Financial literacy seekers	200M+ (EU)	FinSense Academy (free tier)
Active traders/day traders	15M (EU)	DRL strategies + Telegram alerts
Neobroker partners (B2B)	50+ brokers	White-label API integration

Competitive Advantage

- **DRL-powered** — real ML, not pattern matching
- **Education-first** — FinSense builds trust & reduces churn
- **Privacy-safe** — local LLM inference (no data leaves device)
- **Multi-lingual** — EN/TR/DE → 5 languages planned
- **NVIDIA-optimized** — GPU-native training & inference

Business Model

Freemium SaaS with strong upgrade incentives

FREE TIER

€0

forever

- FinSense Academy (full access)
- Basic scanner (limited symbols)
- Educational content & quizzes
- Community access

PRO

€29/mo

most popular

- Full DRL signal engine (15 agents)
- Real-time Telegram alerts
- Multi-timeframe scanner (500+ stocks)
- PilotShield risk controls
- AI financial agent (LLM-powered)

ENTERPRISE / API

Custom

B2B white-label

- White-label API for neobrokers
- Custom DRL model training
- Dedicated GPU inference endpoints
- Co-branded FinSense education
- Priority support + SLA

GROSS MARGIN (SAAS)

Roadmap

From MVP to scalable AI platform — powered by NVIDIA

- **📅 Completed (2024-Q1 2026)**
MVP built: 15 DRL models, FinSense Academy, scanner, Telegram bot, public website, 493 tests, CI/CD pipeline, beta waitlist
- **📅 Q2 2026 — GPU Acceleration**
NVIDIA GB10 deployment, DRL model retraining (10-20x faster), Sharpe optimization >0.5, TensorRT inference setup
- **📅 Q3 2026 — Beta Launch**
1,000 beta users, Next.js web UI (Apple-style), local 70B LLM inference, subscription payment integration
- **📅 Q4 2026-H1 2027 — Scale**
SaaS public launch, B2B API for neobrokers, 5 languages, EU regulatory compliance, Series Seed fundraise

📅 NVIDIA Inception Benefits Sought

- ➔ **DLI Training Courses** — upskill team on CUDA, TensorRT, DRL optimization
- ➔ **Preferred Hardware Pricing** — GB10 DGX Spark purchase with Inception discount
- ➔ **Cloud Partner Credits** — AWS/GCP/Azure for burst GPU training
- ➔ **VC Alliance Access** — investor introductions for future Seed round
- ➔ **Inception Showcase** — visibility in NVIDIA startup ecosystem
- ➔ **Technical Support** — direct access to NVIDIA engineers for optimization

📅 Funding Status

Stage	Pre-Seed
Bootstrapped Invested	~€15K (development time + infra)
Grants Pipeline	€300K-1M (Austrian grants applied/planned)
Cloud Credits Target	\$250K-800K (global programs)
Planned Seed Round	2027 — post product-market fit

Let's democratize finance with **AI**.

FinPilot combines Deep Reinforcement Learning, financial literacy education, and real-time market intelligence — all powered by NVIDIA GPU compute.

WHAT WE'RE LOOKING FOR FROM NVIDIA INCEPTION

 DLI Training Access ·  Preferred Hardware Pricing ·  Cloud Credits
 VC Alliance Network ·  Ecosystem Visibility ·  Technical Support
